

LAXCE

Blockchain Ecosystem

Litepaper

Table of Contents:

1. Introduction

2. Technology

3. Tokenomics and Distribution

4. Ecosystem Products

- 4.1 ICO
- 4.2 Centralized Exchange
- 4.3 NFT Marketplace
- 4.4 DEX and AMM
- 4.5 IDO & Crowdfunding
- 4.6 DEX Wallet: mobile and web extension
- 4.7 Staking
- 4.8 Yield Farming
- 4.9 DeFi Card and DeFi Credit Card
- 4.10 Telegram Token Tracker
- 4.11 AI/ML Based Analytics and Strategies

5. Roadmap and Development plan

1. Introduction

This LAXCE Blockchain Ecosystem is a comprehensive and dynamic project designed to reshape the decentralized finance (DeFi) landscape. The project is meticulously crafted with a strategic phased approach to establish a strong foundation, foster community engagement, enable user interactions and trading experiences, and ultimately evolve into a full-spectrum DeFi ecosystem.

Building upon this foundation, the project seamlessly transitions into enabling user interaction and trading experiences. Partnerships with cryptocurrency exchanges, the development of a centralized exchange platform, and the introduction of trading strategies create a vibrant ecosystem. Moving towards decentralization, the project expands its capabilities with a robust blockchain network, a decentralized exchange (DEX), and user-friendly wallets, providing users with greater control over their assets in the decentralized realm.

The evolution culminates in a full-spectrum DeFi ecosystem, offering users a diverse array of financial services. This phase introduces an IDO launchpad, staking module, yield farming strategies, and AI/ML-based analytics, reflecting a strategic entry into the decentralized financial landscape. A Telegram-based token tracker ensures real-time market insights. Through this holistic approach, the LAXCE Blockchain Ecosystem endeavors to not only meet but exceed the evolving expectations of its community, contributing meaningfully to the decentralized future of finance by innovatively blending technology, decentralization, and inclusivity.

1.2 Objectives of LAXCE Blockchain areas follows:

Provide a secure and efficient Blockchain Ecosystem

Increase accessibility to Blockchain technology

Introducing consensus mechanisms like POA, POS, DPO

Enable a wide range of decentralized applications

Incentivise developers and miners

Create a highly secure and efficient digital asset system

Disrupt the Blockchain space

Introduce innovative services and features

2. Technology

The LAXCE Blockchain Ecosystem leverages a cutting-edge technology stack to ensure the security, efficiency, and scalability of its platform. The technology stack encompasses various components across the project's evolutionary phases:

Foundational Phase:

- Website Development
- Community Engagement Modules (ICO, Pre-sales, Airdrops)

User Interaction and Trading Experiences:

- Cryptocurrency Exchange Partnerships
- Centralized Exchange Platform
- Introduction of Trading Strategies

Transition to Decentralization:

- Blockchain Network Development
- Decentralized Exchange (DEX)
- User-Friendly Wallets

Full-Spectrum DeFi Ecosystem:

- IDO Launchpad
 - Staking Module
 - Yield Farming Strategies
 - AI/ML-based Analytics
 - Telegram-based Token Tracker
- 

Tokenomics & Distribution

Token Name: LAX Coin

Symbol: LAX

Blockchain: Polygon

Total Supply: 50 million

ICO: 25 Million

Decimals: 18

SEED SALE & PRIVATE SALE (18% OF TOTAL SUPPLY)

ADVISORY (4% OF TOTAL SUPPLY)

PRE SALE/PUBLIC SALE (50% OF TOTAL SUPPLY)

TECHNICAL TEAM (15% OF TOTAL SUPPLY)

AIR DROP (4% OF TOTAL SUPPLY)

MARKETING (4% OF TOTAL SUPPLY)

ECOSYSTEM (4% OF TOTAL SUPPLY)

RESERVE (1% OF TOTAL SUPPLY)

4. Products of the Ecosystem:

4.1 LAXCE Blockchain Ecosystem's ICO:

LAXCE Blockchain Ecosystem ICO encompassing the Seed Sale, Private Sale, Pre Sale, and Main Sale (Public Sale), signify significant milestones in our fundraising endeavor. These events are intricately devised to afford interested participants the opportunity to procure LAX Coin tokens, the native cryptocurrency of the LAXCE Blockchain ecosystem.

Key Features of LAXCE Blockchain Ecosystem's ICO:

- Rewards Mechanism
- Hybrid Model
- Investor Protection Mechanisms
- Fair and Transparent Process
- Airdrop Module

4.2 LAXCE Blockchain Ecosystem's Centralised Exchange:

Business Use Cases of LAXCE Blockchain Ecosystem's Centralized Exchange:

- Cryptocurrency trading
 - Token listing
 - Market analysis
- 

4.3 NFT Marketplace:

- NFT Marketplace Launch
- Secure Buying and Selling
- One-Stop Shop
- User-Friendly Experience
- Advanced Security Features
- Easy Transactions
- Revolutionizing Digital Asset Ownership

4.4 DEX and AMM:

- Decentralized Exchange (DEX) Launch
 - Automated Market Makers (AMM)
 - Liquidity Pools and LP Tokens
 - Dynamic Liquidity Management
 - Subgraph Feature
 - Staking Benefits
 - APY and Privacy
 - Higher Returns Through APY
 - Wider Asset Range and Lower Fees
 - Eliminating Intermediaries
- 

4.5 IDO and Crowdfunding:

- IDO Launchpad Launch
- User Access to Pre-Listed Tokens
- Robust and Compliant Platform
- Staking Contract and Yield Generation
- Liquidity Locker and LP Token Security
- Vast Investor Network Connection
- Quick and Easy Token Launches
- Highly Secure with Equal Token Allocation
- Benefits for Token Issuers
- User-Friendly Interface
- Smart Contracts for Launchpad

4.6 DEX Wallet: Mobile Wallet and Web Extension Wallet

Features:

- Decentralized Wallet Structure
- User-Friendly Interface
- Quick and Easy Transactions
- Backup and Recovery
- QR Code Scanning
- Transaction History
- Security Features

4.7 Staking:

- Staking Interface
- Rewards Distribution
- Smart Contracts
- Staking Pools
- Monitoring and Analytics

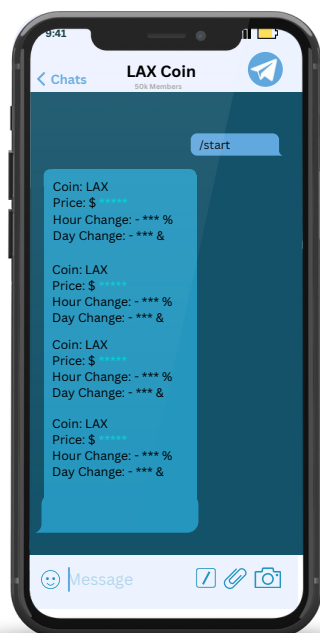

4.8 Yield Farming

- Rewards and Yield Tokens
- Staking Pools and Flexibility
- Smart Contract Security
- Community Governance

4.10 Telegram Token Tracker:

- Real-Time Portfolio Updates
- Transaction History
- Customizable Alerts
- Multi-Chain Support
- Privacy and Security
- Community Engagement

4.9 DeFi Card and DeFi Credit Card:

DeFi Card:

- Decentralized Spending
- Integration with DeFi Protocols
- Security and Transparency

DeFi Credit Card:

- Collateralized Credit
- Decentralized Credit Scoring
- Interest and Repayment

4.11 AI/ML Based Analytics & Strategies:

- Predictive Analytics
- Risk Management
- Automated Execution
- Adaptive Learning
- User-Friendly Interface
- Community Empowerment
- Transparency and Security

Note:

LAXCE Blockchain ecosystem does not provide financial advice, and users are encouraged to conduct their own research before making any financial decisions. Additionally, the LAXCE Blockchain ecosystem reserves the right to add/delete/modify the content provided in this whitepaper at its discretion.

Development Plan

ICO

Initial Coin offering along with airdrop mechanism and Tokenomics Distribution.

01

Centralized Exchange

Coin Listing support along with Trading strategy development and Rewards and Referral system

02

Decentralized Exchange

Building a Blockchain network providing DEX, Swap and Wallet connect functionality.

03

04

Defi Ecosystem

Providing IDO Launchpad, staking module, yield farming along with Telegram Token Tracker and AI/ML based Analytics.

05

NFT Marketplace

Providing features like Trading, Auctions and Minting.

06

DeFi Card & DeFi Credit Card

Empower your spending with the DeFi card, bridging digital assets to real-world transactions within LAXCE.

Elevate your financial freedom with the DeFi credit card, collateralizing your crypto holdings through smart contracts on LAXCE.
